Foundational Studies	Theoretical Nursing	1		2	To complete the DNP course and earn the degree, students must earn at least 18 credits over three years. The curriculum consists of “Foundational Studies,” which provide the foundation for research, and “DNP Specialized Courses,” which develop expertise in practice transformation. Students must fulfill the following credit requirements. •Foundational Studies (at least 4 credits): Students acquire knowledge of quantitative and qualitative research methods and theoretical frameworks. They must select and complete at least two of the courses offered. •DNP Specialized Courses (14 credits): Students must complete 6 credits of specialized courses essential to DNP practice, covering organizational transformation, leadership, policy, and quality improvement. They must also complete the Special Seminar on DNP (2 credits) and Special Research in DNP, conducted over three years (6 credits). All of these courses are required.
	Advanced Quantitative Research Methods	1		2	
	Advanced Qualitative Research Methods	1		2	
	Review Study	1		1
